

Description: Assistant Professor of Biology - Microbiology/Genetics

Starting Date: September 1, 2012

Qualifications: Ph.D. in Microbiology, Genetics, or related field. Preference will be given to candidates with a documented record of excellence in teaching and a research focus that complements existing faculty strengths and that serves the long-term interests of the program, department, college and university.

Responsibilities: This is a full-time tenure track position in the Biology Program. The successful candidate will be expected to teach some combination of the following courses: Genetics, Microbiology (for Biology majors), Microbiology (for Health Science majors), and Gene Manipulation and Genomics. Future course development in bioinformatics is likely. The teaching load in the natural sciences is 12 credits (typically two courses plus 1-2 laboratories) per semester. The successful candidate will develop an active research program in which undergraduate students will be able to participate. Additional responsibilities will include academic advising, curriculum development, course coordination, grant writing, and other service to the Biology Program, the College, and the University.

Rank and Salary: Commensurate with qualifications.

The Program: The Biology Program is housed within the Department of Life Sciences in the College of Natural Sciences, Health Sciences and Business. The program supports approximately 200 biology majors, as well as majors in Marine Biology and Animal Behavior, and minors in several sub-disciplines. The full-time faculty members in biology have received support from federal and private foundation grants. Students and faculty in biology are active in field and laboratory research, study abroad programs, and internships. The Department of Life Sciences has a full-time laboratory coordinator.

The College: The College of Natural Sciences, Health Sciences and Business offers undergraduate and graduate programs through five departments - Life Sciences (biology, environmental science, psychology), Computational and Physical Sciences (chemistry, computer science, information technology, mathematics, physics/engineering, software engineering), Health and Human Movement Sciences (athletic training, exercise science, health sciences, nursing, physical and health education, physical therapy, public health, recreation), Nursing, and Business, Economics and Accounting. The College has a strong staff of academic administrative and support personnel.

The University: Founded in 1846, Carroll University is an independent, co-educational comprehensive institution grounded in the liberal arts tradition. Carroll University is located in suburban Waukesha, 16 miles west of Milwaukee and 60 miles east of Madison. The University serves approximately 3,520 full-time and part-time undergraduate and graduate students. The University, though intentionally ecumenical and non-sectarian in approach, is related to the Presbyterian Church, USA.

Application: Review of applications will begin immediately and continue until the position is filled. Please submit a 1) letter of application, 2) curriculum vitae, and 3) statement of teaching philosophy as Word or PDF format attachments in an email with the subject line "Assistant Professor of Biology" to facapp@carrollu.edu. Final applicants will be asked to submit graduate transcripts and three letters of reference.

Carroll University is an Equal-Opportunity Employee
