

# Master of Science in **Sport** Physiology & **Performance Coaching**

## Admission Instructions, Requirements & Supplemental Application Materials

### ADMISSION TIMELINE

Each cohort commences in the summer term. Applications are reviewed case-by-case on a monthly basis, continuously throughout the year and prior to the start of the summer term (early June). As decisions are made on applications, applicants are notified through the Office of Admission. Applicants must be eligible to return in good standing (be free of academic or disciplinary probation) to all institutions previously attended.

### REQUIRED APPLICATION MATERIALS & CHECKLIST

- Carroll University [Graduate Studies Online Application](#). (Found online at [carrollu.edu/apply](http://carrollu.edu/apply))
- Carroll University SPPC Program Supplemental Application Packet (see enclosed pages 2 - 7), which includes the following:
  - SPPC Essay form (must be typed)
  - SPPC Experiences Document or a professional resume
  - List of Three References
  - Safety & Technical Standards Form
- Official post-secondary transcripts from all institutions attended

### PREREQUISITE REQUIREMENTS

- Baccalaureate degree from an accredited institution prior to matriculation
- Cumulative and Pre-professional GPA of 2.5 (on a 4.0 scale) is recommended to be considered for admission
  - Pre-professional courses should typically be completed within the past seven years from the time of application with grades of 'C' or better. Candidates with coursework older than seven years should have relevant experience in the field to be considered. Pre-professional courses are indicated below with an asterisk.
- Proof of current CPR and First Aid certification for the professional rescuer is required prior to commencing the program (not required at the time of application).
- National Strength and Conditioning Association's (NSCA) Certified Strength and Conditioning Specialist (CSCS) credential. If not certified, individuals will be required to become certified during the first term of the program (not required at the time of application).
- Successful completion of all college-level prerequisite course work:
  - One semester of anatomy with a lab, or combined anatomy and physiology with a lab\*
  - One semester of physiology with a lab, or combined anatomy and physiology with a lab\*
  - One semester of exercise physiology\*

Note: International students may have additional admission requirements.

### SUBMISSION OF ADMISSION MATERIALS

Please submit official documents to Carroll University Office of Admission 100 North East Avenue, Waukesha, WI 53186 and supplemental documents to [gradinfo@carrollu.edu](mailto:gradinfo@carrollu.edu) or the address previously stated.

### QUESTIONS

Please contact Dave Buehler, Graduate Admission Counselor, at 262.524.7359 or [dbuehler@carrollu.edu](mailto:dbuehler@carrollu.edu)

# SPPC Essay Form

## APPLICANT SECTION:

Applicant's name (print): \_\_\_\_\_ Date of Birth or Carroll ID #: \_\_\_\_\_

## INSTRUCTIONS:

Please type or computer generate your essay within the space provided or include an attached typed document. Submit to Carroll University Graduate Admission: 100 N. East Avenue, Waukesha WI or gradinfo@carrollu.edu.

## ESSAY:

Your essay should address the following points:

1) Understanding of sports physiology as a career path, 2) Reflection on your personal interest in the field as well as any related academic or practical experiences you have had, and 3) Your future professional goals as well as the role of your graduate education in achieving those goals. Hand written statements will not be evaluated.

Applicant's signature: \_\_\_\_\_ Date: \_\_\_\_\_

Carroll ID # (If known)

Successful participation in the Carroll University Master of Science in Sport Physiology Program requires that a candidate possess the ability to meet the requirements of the program. Though the program may modify certain course requirements to provide a person with a handicap an equivalent opportunity to achieve results equal to those of a person without a handicap, there are no substitutes for the following essential skills.

The applicant/candidate must initially meet the health requirements and technical standards described below to gain admission to the Master of Science in Sport Physiology & Performance Coaching Program. If a student has a change in health status while enrolled in the program, the student is required to inform his/her program adviser and update the technical standards form. Where applicable, the Master of Science in Sport Physiology & Performance Coaching Program might require submission of supporting documentation from appropriate providers.

## REQUIREMENTS

1. Completion of the technical standards form is required upon admission to the SPPC Program.
2. The form must be updated immediately if the student has a change in his/her ability to meet safety and technical standards at any point within the program.

## DIRECTIONS

To indicate you are able to meet the safety and technical standards described below, initial each paragraph and sign at the bottom of page 2. Any evidence of a possible violation of the safety and technical standards might be cause for further evaluation at the university's discretion and/or dismissal from the Master of Science in Sport Physiology & Performance Coaching Program. Evidence of possible violation may be obtained from the application materials, interviews or visual observations. Further evaluation may entail an interview or a physical examination by a physician or other provider of the university's choice.

## TECHNICAL STANDARDS FOR CARROLL UNIVERSITY SPPC STUDENTS

In preparation for professional roles, sport physiology students are expected to demonstrate the ability to meet the demands encountered within the career field. Certain functional abilities are essential for the delivery of safe and effective interventions. An applicant to the SPPC Program must meet and maintain the following safety and technical standards for progression throughout the program. Students unable to meet these technical standards will not be able to complete the program. Students shall notify the program in a timely manner of any change in their ability to meet technical standards.

Initial here \_\_\_\_\_

The safety and technical standards include, but are not limited to, the following:

**Physical Ability.** The student must be able to perform gross and fine motor movements with sufficient coordination needed to provide safe and effective assessments and interventions for clients/patients across the lifespan. The student is expected to possess the psychomotor skills and physical abilities necessary to safely and correctly perform a wide variety of health/fitness screenings, assessments, exercise tests, and exercise demonstrations. Examples of assessments include, but are not limited to, resting vitals and other biometrics, cardiopulmonary tests, functional capacity, ECG, anaerobic testing, musculoskeletal fitness, range of motion (ROM), body composition, balance, and functional abilities. Interventions include, but are not limited to, patient education, cardiovascular fitness training, endurance training, resistance training, performance training, flexibility and ROM, neuromuscular training, and functional training.

The student must have sufficient levels of physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving and physical exertion required for safe client / patient care. Students must be able to bend, squat, reach, kneel and balance. The curriculum might require students to carry and lift load from the floor, from 12 inches from the floor, to shoulder height and overhead. The student must be able to occasionally lift 65 pounds from the floor to the waist, frequently lift or carry 25 pounds for distances up to 100 feet, and constantly lift up to 10 pounds. The student is expected to possess sufficient static and dynamic balance as well as agility to perform satisfactorily in clinical and performance settings.

Initial here \_\_\_\_\_

**Communication Ability.** The student must communicate effectively verbally and non-verbally to obtain important information and to clearly explain information to others as well as to facilitate communication among the patient, family members and other professionals. Each student must have the ability to speak and comprehend the English language as well as be able to read and write in a manner that meets the standards for literacy in higher education. Students must be able to actively listen and possess basic interviewing skills. The student must be able to document and maintain accurate records, and present information in a professional and appropriate manner to the target audience.

Initial here \_\_\_\_\_

# SPPC Safety and Technical Standards Forms (continued)

(continued)

**Intellectual/Cognitive Ability.** The student must demonstrate the ability to develop critical thinking and problem-solving skills essential to the field of sports physiology. Problem solving skills include the ability to measure, calculate, reason, analyze, synthesize, and judge objective and subjective data, and to make decisions in a timely manner that reflect thoughtful deliberation and sound judgment. The student must also possess the ability to comprehend, retain, retrieve and incorporate prior knowledge with new information from multiple sources including, but not limited to self, peers, instructors and related literature to formulate sound decisions for competent client/patient management, practice management and scholarship.

Initial here \_\_\_\_\_

**Interpersonal Attributes.** The student is expected to demonstrate sufficient stable emotional behavior to effectively work with others, perform assessment, and perform intervention activities. Empathy, integrity, motivation, honesty, and caring are personal attributes required of those in the SPPC Program. The student must have the ability to establish rapport and maintain respectful interpersonal relationships with individuals, families, groups and professionals from a variety of social, emotional, cultural and intellectual backgrounds and to collaborate effectively. Each student must be able to adapt to changing environments, displaying flexibility and a positive demeanor as well as to accept and integrate constructive criticism given in the classroom and professional settings. In addition, the student must demonstrate personal responsibility and accountability for their actions and reactions to individuals, groups, and situations to include the prompt completion of all responsibilities and tasks in the classroom and professional settings. Students must demonstrate continuous self-assess to improve as a professional.

Initial here \_\_\_\_\_

**Ability to Manage Stressful Situations.** The student must be able to adapt to, and function effectively in relation to, stressful situations encountered in both the classroom and professional settings, including emergency situations. Students will encounter multiple stressors while in the Master of Science in Sport Physiology & Performance Coaching Program, and must effectively manage these stressors on an ongoing basis. These stressors might be related to (but are not limited to) personal issues, family, peers, supervisors/faculty, and clients/patients.

Initial here \_\_\_\_\_

**Health Screening and Background Check.** The student is required to have completed a health screening, updated immunizations and tuberculosis screening according to current [Centers of Disease Control and Prevention \(CDC\)](#) recommendations for health professionals, criminal background investigation and drug screening as required by internship placement sites. Exceptions to the immunization requirements will be considered on a case-by-case basis where, for example, a student has an allergy to a vaccine or one of its components. If an exception to the immunization requirements is approved, the University cannot guarantee that its affiliated hospitals and clinics will allow the student to participate in patient care, which is a fundamental requirement of the clinical education component of the Program.

Initial here \_\_\_\_\_

**Evaluation.** An applicant/candidate with a handicap shall not, on the basis of his or her handicap, except those that would preclude the essential skills outlined above, be excluded from participation in, denied the benefits of, nor be subjected to discrimination in the program. Carroll University may require that the applicant/student undergo a physical examination and/or an occupational skills evaluation.

All Master of Science in Sport Physiology & Performance Coaching students must be able to perform the essential functions of a student sport physiologist. Reasonable accommodations will be afforded to students with disabilities as required under the Americans with Disabilities Act of 1990. A student who can no longer perform the essential functions of a student physical therapist must report this to his/her program adviser. If reasonable accommodations cannot be made, the student will not be able to remain in the Master of Science in Sport Physiology & Performance Coaching Program.

I certify that the information submitted in this form is complete and correct to the best of my knowledge.
