

A.A.S. Surgical Technology > B.S. Psychology

Psychology is a life science that focuses upon the physical and mental processes that underlie individual behavior. This definition provides a focus for the objectives of the psychology program at Carroll University. The program numbers among its liberal learning objectives those of enriching students' understanding of scientific methods and giving students a thorough knowledge of the subject matter central to their better comprehending people.

In addition to its emphasis upon liberal learning, the program strives to offer a major that provides an excellent foundation for those who wish to pursue graduate studies. The program takes great pride in its strong track record of launching psychology majors into academic and professional careers. Academic careers include teaching and research in biological, cognitive, or social psychology; professional careers include serving people in clinical, counseling, or industrial/organizational settings.

A minimum of 40 credits are required for the Psychology major. Six elective courses in Psychology or completion of an area grouping in clinical/counseling, industrial/organizational, research or pre-PT. Students interested in pre-PT or pre-OT, should consult with an admission counselor.
